

TRX Retail POS System

Grow your retail business with ease using the TRX Retail POS System

Our hub is built to save you time while boosting revenue; it's designed to scale alongside your retail business success.

No More Guesswork on Customer Buying Habits

Stop guessing what your customers want. Increase your average ticket by putting customers' favorite products and average spend at your employee's fingertips DURING the sale.

Customer Loyalty

A digital rewards program that actually talks to your sales platform. Our platform is fully customizable and works across all of your retail stores - allowing a customer to accrue points in one state and spend them in another.

Sales Analytics

No more complicated data exports. Visualize and deep-dive your reporting all through your admin portal. See current and easy-to-understand reports on your Sales, Inventory, Trends, and sales associates. Compare and contrast performance across locations, balances inventory and staffing. Profit reports help ensure you stock your shelves with the best products.

Franchise Support

Manage how your entire operation runs - whether it's 2 locations or 200. Dictate products that locations can carry, manage royalties, and see reports for all locations in one place.
